

1668.

# Apollo Anglicanus:

THE  
ENGLISH APOLLO:  
Astronomically observing, and  
Astrologically demonstrating, those  
grand Catastrophes; and superlative  
Actions designed by the Heavens  
to be manifested in the World  
this present Revolution.

With necessary Tables plain and useful.

A twofold Kalender, viz. *Julian* or *English*,  
*Gregorian* or *Foreign* Computations, more plain and  
full than any other; with the Sun and Moons  
Risings, and Settings, dayly observ'd.

*Being Bissextile or Leap-year.*

By RICHARD SAUNDERS

*Student in Astrology and Physick.*

*Cognosce alia, ut te cognoscas; cognosce teipsum, ut cog-  
noscas Deum.*

*Est Deus in Cælo revelans arcana quæ ventura sunt in No-  
vissimis Temporibus. Animis hæc scribo, non Auribus.*

LONDON, Printed by E. Cotes, for the  
Company of Stationers, MDCCLXIII.

A Table shewing how many years Purchase a Lease or Annuity, to endure for any Term of years under 33, is worth presently at Interest upon Interest, at six in the hundred: and shewing plainly how to discount any Lease in Being, and the true value of the Reversion after any number of Years.

Years of a Lease.	Years.	Months.	dec. par.	The use and Explanation of this Table.	Years of a Lease.	Years.	Months.	dec. par.
1	0	11	0	The first Column towards the left hand, sheweth the years of a Lease or Annuity, and right against each Year, is the Years Months and Decimal parts of a Months purchase, that such a Lease or Annuity is worth.	17	10	5	8
2	1	9	9		18	10	9	9
3	2	8	1		19	11	1	3
4	3	5	9		20	11	5	7
5	4	2	5		21	11	9	3
6	4	11	0	<i>Example.</i>	22	12	0	5
7	5	7	0	Suppose a Lease or Annuity to contineten Yeares, and you would know how many yeares purchase it is worth in present money, lookin the Table for ten yeares of a Lease to the left hand, and against the same you shall find 7,43 which sheweth such a Lease to be worth seven yeares four months, and three tenth Parts of a Months purchase.	23	12	3	6
8	6	2	5		24	12	6	6
9	6	9	6		25	12	9	4
10	7	4	3		26	13	0	0
11	7	10	7		27	13	2	5
12	8	4	6		28	13	4	9
13	8	10	3		29	13	7	1
14	9	3	6		30	13	9	2
15	9	8	5		31	13	11	1
16	10	1	3		32	14	1	0

Again, are you to take or buy the Reversion of any Lease or Annuity, work thus, Suppose the Lease to be thirty yeares in all; you find in the second Table, and right hand against thirty, 13 yeares 9 months, and two tenth Parts of a months purchase; this it were worth, were it in present possession. But suppose there be a Lease of five yeares (more or less) before your Commence, look in the Table against the five Yeares, and there you find four Yeares, two Moneths, five tenth parts, halfe a Moneths purchase; take this out of the sum against thirty, which is 13,9,2,4,5. The remainder is 9 yeares six moneths, seven tenth parts of a month, and so much is the Reversion after five yeares worth, the remainder of thirty yeares. This is usefull and very easie.

# The REGAL Table.

Charls 2 | 1630 | 1648, Jan. 30 | Nos te florentie beati Sumus.

*This Table tells us of our Cæsars Birth,  
 When 'gan to-Raign, how long they swey'd on Earth  
 In Pageant glories, real cares and pains,  
 And last recounts the end of all their Reigns.  
 Conclude in Dust, oh sad! what's learned here?  
 But Dire remembrances that once they were:  
 Of Twenty six, doth only one remain,  
 Whom God preserve, grant long and prosperous Raiga.*

Forewarn'd, forearm'd, the Terms approach you see;  
No Musick's sweet, like Angels Harmonie.

Hillary-Term begins Jan. 23. and ends Feb. 12.

Return or Effoin days.	Exception days.	Returna vium.	bre-	Days of Ap- pearance.
Olla. Hill. Jan. 20	January 21	January 22	January 23	January 23
Quin. Hill. Jan. 27	January 28	January 29	January 30	January 30
Craft. Pur. Feb. 3	February 4	February 5	February 6	February 6
Olla. Purif. Feb. 9	February 10	February 11	February 12	February 12

Easter-Term begins April 8. and ends May 4.

Quind. pas. Apr. 6	April 6	April 7	April 8
Tres. pasc. Apr. 13	April 13	April 14	April 15
Mens. pasc. Apr. 20	April 20	April 21	April 22
Quind. pasc. Apr. 27	April 27	April 28	April 29
Craft. ascens. May 2	May 2	May 3	May 4

Trinity-Term begins May 22. and ends June 10.

Craft. Trin. May 18	May 19	May 20	May 21
Olla. Trin. May 25	May 26	May 27	May 28
Quin. Trin. June 1	June 2	June 3	June 4
Tres. Trin. June 8	June 9	June 10	June 11

Michaelmas-Term begins Octob 23. and ends Nov. 28.

Tres. Mich. Oct. 20	October 21	October 22	October 23
Mens. Mich. Oct. 27	October 28	October 29	October 30
Craft. Anim. Nov. 3	November 4	November 5	November 6
Craft. Mar. Nov. 12	November 13	November 14	November 15
Olla. Mar. Nov. 18	November 19	November 20	November 21
Quin. Mar. Nov. 25	November 26	November 27	November 28

Note, The Exchequer opens eight days before any Term begins, except Trinity Term, before which it opens onely four dayes.

Note, That the first and last dayes of every Term, are the first and last dayes of Appearance.

*Directions for the subsequent Diary, or Almanack.*

1. **I**N the first column to the left hand, on the left hand page, you have the Numerall figures of the days of the Month.

2. In the second column you have the week days, and Dominical Letter.

3. You have all the principal and observable Saints days and others; the places of the Planets, and the Moon most nights, with what fixed Stars she is with, is observed; by which the Asterisms and constellations are easily known to an ingenious eye and understanding.

4. The Moons place in the Zodiack every day at noon.

5. The age of the Moon, by which the Tides are known.

6. The rising or setting of the Moon, every day in the year.

7. The general state of the weather, with much care performed by the Author.

8. In the 8. column, the first on the right hand, you have the English account. In the 9. the Forain. In the 10. the Roman week days, and Sunday Letter.

11. The perfect Roman Kalender and Saints days.

12, 13, and 14, the utmost to the right hand, you have the dayly rising and setting of the Sun, with the Aspects.

*A Table to find when the Moon will be full South every day this year, whereby the time of Tides is exactly known.*

*M. A. H. b. f.* First find her age in the 5. column of the Almanack, which is exactly every day noted; which age seek out in one of the two columns of this Table to the left hand, against which in the third and fourth columns is the hour and minutes which shew the time of the Moons being South.

As for Example, the 21 day of March the Moon is 19 days old, which being found in 2. column of this Table against 4, to the right hand it points to 3 h. 12 m. at which time the Moon is South the said 21 day of March, 1667. *Et sic de cæteris.*

Here note, that all the increase she cometh to the South in the evening following the Sun; but in the decrease, in the morning going before the Sun.

By any Sun-diall you may know the hour of night by adding to the time of the Moon being South after, or subtracting before;

To find the time of high water in most Coasts of England.

**F**irst, as you before were taught, find at what time the Moon will be South, for then you may truly conclude it High-water at Southampton, Quindborough, and Portsmouth, for there the South and North Moons make a High-water. But when you desire the time of Full Sea in any of the following Coasts in the ensuing Table, find the name of the place, and see how many hours and minutes be annexed thereunto in the column under H.M. which added to the time of the Moons coming to South, gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

<b>R</b> ochester, Maldon, Aberdeen,	0 45
Gravesend, Romney, Ramkins,	1 30
London, Tinnmouth, Hartlepool,	3 0
Frisb, Leith, Dunbar, Narbon,	4 30
Newcastle, Falmouth, Humber,	5 15
Lin, Antwerp, Plymouth, Hull,	6 0
Bristol, Lanion, Foulness,	6 45
Milford, Bridgewater, North-coast,	7 30
Portland, Peterport, Hartstew,	8 15
Dover, Tarmouth, Harwich, Dublin,	10 30
Calice, Rye, Winchelsey, Calbat.	11 15

Example.

**T**HE 21 of March this year, it is required to know the time of full Sea at New-castle: by the Kalender over against the 21 of March, in the fifth Column, I find the Moon nineteen days old, and by the foregoing Southing-Table, I find the Moon South at 3 hours 12 minutes in the morning; then in the preceding Table, against Newcastle I find 9 hours 15 minutes, which added to 3 hours 12 minutes, the aggregate is 8 hours 27 minutes, wherefore I conclude it High-water there at 8 hours 27 minutes in the morning: so of any other.

Take notice that the Tide flowerb one point of the Compass more at the Spring-Tide (which is the New and Full Moons) then at the Neap Tides (the first and second Quarters) as also the latitude of the Moon, and Winds, may alter it an hour sooner or later; let it be their providence who depend upon the Tides, to make timely provision.

*The Tides like tympous Humors never rest,  
Still constant in unconstaney at best.*

Some OBSERVATIONS of Eclipses  
in General;

And in particular of this present Year, 1668.

**O**F Eclipses in general we may note two real and apparent differences, in the Eclipses of the Luminaries: First, That the Lunar Eclipse, whether Partial or Total, is universally so, in all the earth; for the Moon really loseth her light, by the Interposition of the Earth betwixt the Sun and her; Therefore, in Quantity and Qualification she is one and the same, visibly, to all places and beholders.

But, its otherwise in the Eclipse of the Sun, which is not general, neither doth it appear to all (that may behold it) alike: Experience manifesteth, that at the same time, the Sun is Eclipsed to some places and People, other places and People enjoy the fruition of his Light and Beames. The reason is obvious, because the Sun loseth no Light at all, suffers no deprivation, but seemingly to our sight; the Splendor whereof is obumbrated, while the dark Opacous Body of the  $\odot$  interposeth betwixt our sight and the Sun: and as the  $\odot$  is Eclipsed, to some parts more, to others, less, and to some not at all; so it differs in time; for to some places it is sooner, to some later: and though in one and the same Climate it appear to all Eclipsed, yet it appears to some more, to others less; as well as to some sooner, and to others later; but I must hasten.

Secondly, Another difference consists in this, that in the Eclipse of the Sun, he alwayes begins to lose his Light on the West-Lymb or part of his Body, because the Moon, by her proper motion, from East to East, and the swiftness of her course, by which she out-strips the Sun; first interposeth the West-side of the Sun, and so passeth on to the East-Lymb, or part of his Body.

But the Eclipses of the Moon alwayes begins on the East-Side of her Body, because that by her motion

## A Prognostication.

from the West, the Oriental Lymb of the Moon first enters the Earths Shadow, which Umbra first toucheth the East part of the Moon; But the Moon enters first the West part of the Umbra. These Observations of the Eclipses are most elegantly set forth by Virgil in his *Georgicks*; wherein briefly in one Verse he comprehends the whole Subject of Eclipses in both Luminaries, saying, *Defectus Lunæ, variis solisque Laboribus*; where he calls the Eclipse of the Moon, A Defect; (*Defectum* in Latin being the same with *Eclipsin* in Greek:), a Loss, a Swooning, or being dead; the Moon then really losing her Light: And the Eclipses of the Sun he calls *Labour*; because the Sun then seems to sustain trouble, labour, impediment, and weakness.

### Next in Particular of Eclipses this present Year, 1668.

**N**OW Christian Year Eclipses shall this year be observed upon the Superstices of this Globe of Mortality; whereof one of the Moon, and one of the Sun will be visible; from England. The other two will not be seen in our Hemisphere.

The first Eclipse is of the Sun, the 30th of April, a little before midnight; which will only be visible in the most remote Southern parts of the World; but will not appear in any part of Europe; therefore I forbear any further mention.

The second Eclipse, in order, is of the Moon, the lesser Lunar; which, in part, will present itself to our view on Saturday, the 16th. of May, in the morning. The beginning at half a quart. after 2. The greatest obscuration at half an hour, 3. in the Morn. The end at five of the clock.

Digits, or parts Eclipsed, will be nine Digits and half. The whole Duration will be two hours, 55 minutes.

The beginning and middle of this Eclipse may very well be seen at London, but before the end thereof the Moon setteth in the West, and the Sun riseth in the East.

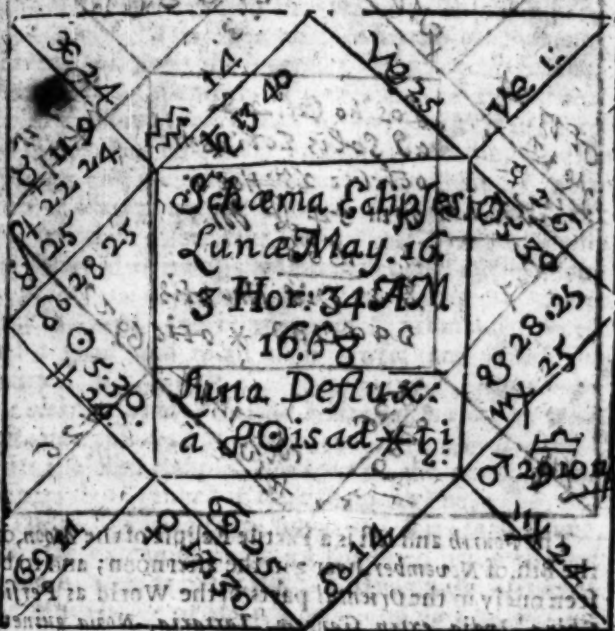

The

S AUNDERS, 1668.

The Light that remains will be on the South part  
the Moons Body, by reason of her Latitude Meridional;  
Ascending.

Behold the Type thereof, and the Position of the  
Heavens, as followeth.

The Third Eclipse, and second Visible will be of the  
Sun on Sunday the 24 of October, presently after High-  
noon; the Sun then in our Meridian.

The beginning will be at 24 min. after Eleven before  
noon; The middle, at 40 min. after noon; The end  
at 50 past one afternoon.

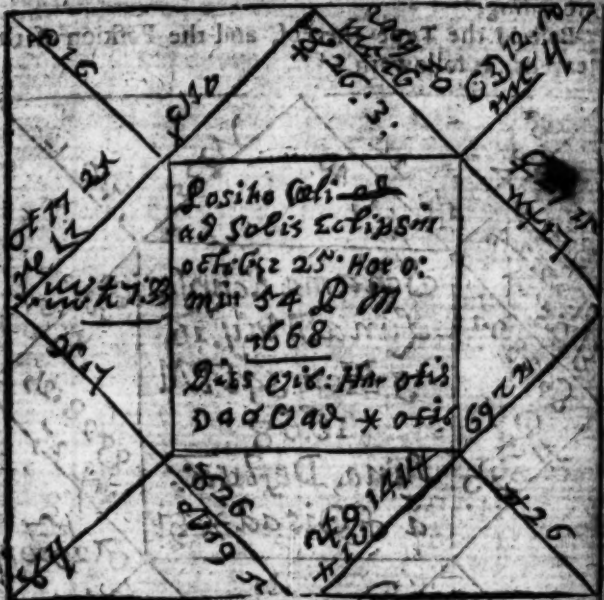

Totall Duration will be 2 houres, 26 minutes.

Digits Eclipsed will be 6. 41 min. a little more, then  
half the Sun's Body, will be obscured from our sight.

The South part of the Sun's Body will be darkned,  
by reason of the Moon's Meridional Ascending Latitude.

# A Prognostication.

And the Position of the Heavens, as this following Scheme representeth.

The Fourth and last is a Partile Eclipse of the Moon, on the 8th. of November, near 3 in the afternoon; and to be seen onely in the Oriental parts of the World as Persia, China, India, extra Gangem, Tartaria, Nova guinea, Malaccas, Sumatra, Java Major & Minor, Japonia, and all Countreyes in the Southern Trade.

In handling of these Eclipses, as to every Contingent, might be from hence derived, would exceed my limits; wherefore my indeavour shall be, from all particulars (well weighing the one with the other) to comprehend the Sence in few words, as perspicuous, and brief as I may.

In the first visible Eclipse which is of the Moon, May the 16th. the Planets stand in their Dignities thus; Saturne is most fortified and strong next Mercury; then Venus, the Sun, Jupiter, and the Moon; and every week

Sept 17

## SAUNDERS, 1668.

*Saturnus in proprio Domicilio suo, siccitatem Augur;* Signifies a dry and cold May, and *Mercury* next in dignities adds wind, and *Venus*, powerful complacency, adds seasonableness, so that we may expect a very good season. The *Moon* eclipsed in the 9th. house of heaven, intimates the increase of many acute diseases, Plurises and Distempers arising from the excess and foulness of blood more than ordinary, which ought to be prevented, by careful and timely bleeding in the Spring; and we may fear some new distempers more than ordinary reigning amongst Men and Cattle: yet *Jupiter* in the Ascendant, with *Caput Draconis*, signifies the good estate of the Common people with plenty, peace, and happiness; and *Venus* ruling the Ascendant in *Sextil*, and reception of ♀ promisseth success and a good end to all their lawful and honest industries.

*Celebrent apud Jehovam benignitatem ejus, & opera mirabilia ejus apud filios hominum.*

In the *Sun's* Eclipse, *October 25.* the commanding Planets stand ranked in their dignities Thus:

The two Malevolents, *Saturn* and *Mars* most strong, *Mars* far exceeding in the 29 Dignities, being exalted in the Ascendant of the time, governing the Eclipse in the ninth house of Heaven and disposing of *Mercury* in the 10th. in *Sextil* to the Luminaries, and trine to *Venus*, seem to threaten us with a cold and long Winter, but very healthful, and people to be lively, active, and thriving. Those Diseases that will be most frequent, are *Consumptions*, *Pneumicks*, and *Obstructions*. I cannot omit to take notice that this Eclipse of the *Sun* falls in the place of *Mars*, and square of *Saturn*, in the *Vernal* ingress, and opposing ♀ in the ninth house of Heaven, and the *Sun* also suffering his Eclipse in the same, and in the Asterism of *Scorpio*: *Mars* likewise, so strongly fortified in the *Horoscope*, adviseth all people to study peace, unity, and concord; and threatens condigne punishment to the contrary; and more than ordinary actions beyond sea, both in Military & Church Affairs.

# 30 A Prægnostication. N 2

Viitam sapient intelligerent ista : Animum aduentu  
rentat finem suum.

In the Vernal Ingress the position of the Heavens in respect of the Planets, their essential Dignities stand as in the preceding Scheme, wherein we find Mercury dominator, far exceeding all the other in fortitudes, which promisseth superlative prosperity to all those thereby signified, which confirms my judgment of the last year, where I affirmed the year 1668, viz. this present year, would be a Jubile to England, and prosperously successful in raising her Metropolisian City out of the dust; and likewise confirms that which I asserted before his Majesties happy Return, viz. that Englands happiness was principally promised under the gubernation and regency of the terrene Trigon, and most chiefly when the Revolutions sympathize and correspond thereunto, as this year. And many years is England like to be happy under this catch'y Trigon, if our unnatural and unchristi-

an murmurings, repinings, and disobedience to Authority. ~~But~~ not. But if there be any such amongst us, that have hearts to wish, or hands to work evil, let them expect deserved punishment; for the Heavens threaten, as their discovery, so their ruine, to this purpose are eminent significations in the latter end of January, the midst of Febr. the Beginning of June, July, October, and November. In this Revolution the Sun is next Mercury most strong, signifying thereby the benevolence, indulgent kindness, and forbearance of Princes to their People, and Superiours to their Inferiours; the effects of which will be love, peace, cheerfulness and obedience in the Inferiours in all degrees; to the Superiours of all degrees.

And to all that till and manure the ground, and deal in Cattle, is plenty promised: but when I speak of plenty, understand me not so much of Quantity, as Quality, viz. good and quick Markets, that bring plenty of money, the scarcity of which these late years (in the midst of other plenty) hath been the greatest famine.

*Nam quæ gens maxima futura est? cui est Deus propinquus ei, sicut Jehova Deus noster est quoriestis in vocamus eum.*

As Heaven hath done great things for us, so providence in the general seems to continue and conspire our happiness for the future, if our ungrateful hearts pull not down wrath upon us: for though Heaven in general promise *Halcyon days*, yet to the flowing vices of the times, and those therein conversant, the Celestial power will be severe, and hath a Treasury of judgments as well as mercies. Therefore grateful repentant hearts towards God, obedience to Magistrates, gentleness, love, and honesty one towards another, will clear the cloudy face of heaven, & scatter those frowning storms of vengeance impending,

*Quod facit Deus.*

*Disponat te Jehova Deus tuus in sublimem supra omnes gentes terræ, & obvenientes tibi omnes benedictiones. Iste assequantur te, quum Auscultabis voci Jehova Dei tui.*

**Of the Four Quarters of the Year.**

*Præcipue cum spectant animalia cætera terram,  
Os homini sublime dedit, cælumque tueri  
Jussit, et erectos ad sidera tollere vultus.*

When other Creatures on the ground do pore,  
Nature gave man a high erected look,  
The Heavens to view, and Deities to adore,  
And read the Characters in that fair Book.

*Of the Spring.*

**E** *Quinotium vernale.* The Spring Quarter begins when the Sun toucheth the first point of the Equinodial sign *Aries*, which this year is on Tuesday, the ninth of March, 5 Hor. 25. afternoon, equalizing day and night. The natural temper of this season is hot and moist; but if the weather vary & deviate from its proper temper, viz. as to be windy and dry, then it is bad for old people, and child-bearing women. If the spring be very wet, expect multiplicity of dangerous Agues the Summer following, with Frensies, Verrigoes, Imposthumes, and the like; but if very wet and warm, with many South winds, its likely to breed dangerous and infectious Diseases. Melancholy persons are best in health this quarter; the Sanguine the contrary; its good for them to breathe a Vain; those diseases which proceed from excess or putrefaction of blood are most dangerous; but those distempers that have their original from Melancholy, are less noxious. Beware of taking Cold, Evening and Morning.

The Constitution of Weather you have each day in the Kalender Pages. These three Months following constitute the Vernal Quarter, on which these Observations are necessary.

*March.*

**I**N this Moneth of March, for your health you may observe that it is good to use pleasant and well Spiced meats, and all things that purge and sweeten the blood, because then the blood stirs, and increaseth in the body.

## SAUNDERS, 1668.

dy: Sharp meats and drinks are to be shunned this Moneth; the pleasant and strongest wine is most commendable; to eat often. Leek portage is wholsome, to bath oft is commended; not good to purge or bleed much this Moneth. Use to eat often the Herb *Penny-royal*, which heats the stomach, and helps digestion; and in Sauces and Sallets the Herb *Berony* is good, for it clears the sight, and strengthens the head; also *Grains*, *Ginger*, *Nutmegs*, *Galingale*, *Pepper*, and such like Spices be good and wholsome in meat and drink this Month.

April

In this Moneth the blood increaseth, wherefore to eat pleasant meats, and River Fish, and Sallets often, is commended; to Bleed and Bathe this Moneth very good; to purge the stomach by Potion or otherwise is good, but to eat any kind of Roots this Moneth is thought hurtful. All kind of Meat moderately taken, except Pigg, is counted good. Its safe to enter into Physick for any grief of the body, but drink moderately; because excessive drinking more contaminates the blood in this Moneth than in any other; to eat *Berony* and *Mints* prepared in *Honey*, and drink first in the morning before you eat any thing, and to drink sometimes the herb of *Grace* in wine is profitable; but beware of eating salt Fish in this month, for it souls the blood, and breeds itches and scabs in the body.

May

In this month wash often thy face with fair running water, but eat not of such meats as be hot in quality; good to bleed, especially in the feet upon occasion. Beware of eating stale fish, or tainted fish; but eat your meals in due season, and drink but little wine this month; to drink clarified whey simple, or drawn with cool herbs, is very healthful unto hot stomachs: Sharp drinks are good; pure wine mixed with Goats milk to anoint both the head and breast, is greatly commended. Good to take physick; not good to eat the head or foot of any Beast this month; to drink wormwood wine is very good, used moderately, but otherwise

### A Prognostication.

it attracteth the lightest parts of the humors, and leaves the mass of humors more obstinate; eat Fennel root tenderly sodden, take gentle physick to purge the blood and body very good, and to sleep moderately after dinner, this month is not discommended.

#### Of Summer.

**W**hen the Summer Quarter is dry, and full of North winds, and the Autumn succeeding rainy, and South winds frequent in it; then, expect Coughs, Rheums, Hoarseness, and Increase of Consumptions, with great pains in the stomach and head the winter following. This Quarter is naturally hot and dry; the Flegmatick are best in health; Cholerick the contrary. This season favoureth old age, and debilitates youth. This Quarter takes beginning with us on Wednesday, 13 minutes past 8 in the afternoon, coming to us and all that live on this side the *Aequator*, longest days, and shortest nights. This is called *Summer*, *Quia tunc plus Solis*, because we have more of the Sun than at other times.

#### June.

In this month abstain from such meats as do ingender flegm; and drink then of the pleasantest wine, and drink sometimes fasting, a Cup of *White Wine*, for it purgeth *choley*, and noxious humors from the stomach. Good to eat *Gallies* of *Lettice* prepared with *Vinegar*; eat such meats as be light of digestion; and all this Moneth glur not the stomach, but arise from the Table with an appetite: Arise betimes in the morning, and exercise your body with some long walk. You may bleed; beware of eating *milk*, unless the same be well sodden. Take heed of eating *Cheese* and *Apples* this Moneth: Not good to stay long in the Bath; to wash the Feet this Moneth often in cold Water, is commended.

#### July.

In this Moneth it is not good to eat strong meats, nor those which do greatly nourish, nor pleasant spiced meats, the season being hot. Beware of bleeding and purging,

## S AUNDERS, 1668:

purging, yet both may safely be done, being guided by discretion. Drink but little *Wine* in this and the moneth following, for that it drys the *stomack* and *liver*, and too much increaseth *choler*; the smallest and weakest drinks are best to be used fasting against *choler*. Abstain from *Venerie*, and use to eat every morning a little *Sage* and *Herbgrace* with a bit of *Bread*. Beware of eating any murthery *Fish* taken with *Net* this Moneth. Use to eat oft *Verjuice* or *Wine-vinegar* with your *Sallets* and *Meat*, for the same doth cool and refresh the body. Refrain eating green *Peas* this Moneth. Its wholesom to anoint the *Neck* and *Breast* with the *Juyce* of *Herbgrace*, *Hyssope*, and *Smalage* mixt with *Hony*. If you bath do it fasting, & very moderately, for to do other wise, is dangerous this Moneth; & beware of eating either *Beets* or *Lettice* this Moneth, for that they have in them a venenous poysonous quality, very noxious to nature. *Garlick*, *Onions*, *Sage*, and fat *Bacon*, is good for the *Husbandman*, and laborious bodies.

### August.

In this Moneth *Choler* with *Melancholy*, *Airra bilis* much increaseth, from whence come lasting *Agues*, and *Fevers* hardly cured. Good to refrain all immoderate exercise, especially *Venerie* this Moneth. Sleep but little in the day time all this Moneth, beware of taking cold, be cautious of *Vomit*, *purge*, or *bleeding* this Moneth. Refrain from *Potherbs* this Moneth, eat no *Cabages*, for they too much ingender *Melancholy*, and cause *Agues*: To eat *Sage* is profitable for the Body. Drink good and pleasant *Wine*, and eat both *Pullets* and *Veal*, for they much comfort the body, and use oft to eat *Cinnamon* in your meats. Our Forefathers were used to help many Infirmities of the body by anointing the same with an Ointment made of *Pennyroyal*, *Herbgrace*, *Fennel*, *Smalage*, the seeds of *Hyssope*, *Bay-berries*, and *Allum*, unto which they added *Oyl-olive*, tempering altogether with *Honey*; to eat *Lettice* and all other things that be cold of quality is this Moneth good.

## 2. A Prognostication.

Of Autumn.

**W**Hich takes beginning this Year, *Septemb. 12.* on *Saturday, 22 min. after 11* in the forenoon, the Sun then entering the first scruple of *Libra*, producing the second *Equinox* to all on this side the *Polar Circle*. It is called *Autumn*, from *Angeo*, *quia tunc fruges augeantur*. This season is by nature cold and dry; therefore the *Sanguine* are now best in health, and the *Melanchole* subject to distempers; best for youth, but worst for age. When this season hath frequent North winds, and is dry, then are men and women of moist *Flegmatick* constitutions, best in health; but persons of other constitutions, are subject to *Fevers* and other distempers incident to their nature.

September.

In this Moneth eat all manner of meats and fruits that your Stomack desires, for all things are now in their proper vigor and perfection. Good to purge, and to this end is highly commendable the flour of *Cassia* new drawn, that gently purgeth and comforts nature, and use cordial powders in your broths; these preserve the body sound till the next Spring. All Simples, Roots, Fruits and Seeds, may be well applied this Moneth, and used on all occasions, as being in their full perfection; *Goats milk* and *Pomegranats* eaten this Moneth are commendable, for that they both increase blood, and cause a good colour.

October.

In this Moneth doth the Body wax dry, and the Brain moist; therefore it becometh to eat roasted meats often in this Moneth, and drink pleasant Wine, also drink new Wine, and eat pleasant meat often; *Goats milk* is held to be excellent good for this Moneth, because it purifies the blood, and cleanseth the Lungs; its good to eat often *Appletarts* prepared with comfortable Spices and Sugar, for they comfort greatly the Stomack; but wash not the head in this Moneth. Let Blood and Purge as occasion requires; beware of eating too liberally of new Fruits; to eat the *Rhadish* root is wholesome, and

# SAUNDERS, 1668.

to eat *Mustard* with your meats, is very commendable; all wild Fowls this Moneth are wholesome and good, and Cloves with Cinnamon in meats, sauce, drinks, or cham-ped in the mouth, are very good.

*See From November.*

In this month Melancholy much increaseth, & blood decreaseth; its good to vomit sometimes. Eggs and hony now are very wholesom. Salt powdered meats are good; this is the most perillous time in the Year to Bathe in, for the Blood is most restrain'd within the Arteries, and sweating either in *Bathes* or *Houses*, (for what is spoken of one, is to be understood of the other) stirs up the humors, and provokes distillations from the head, causeth dimps of sight, and pains in the eyes and head: This Moneth you may purge or bleed as need requires; the eating of *Honey* this Moneth, *Ginger*, *Pulse*, and *Goats Milk*, are very wholesome, and profit-able to the body, for that they increase blood, and cause a good colour; and Cinnamon and *Ginger* drunk often this Moneth, give health, and are commendable, and beware you go not early forth of doors this Moneth, (those that can avoid it) because of Fogs and Mists which greatly offend the Head and Stomack, but let the Sun have first some power on the Horizon.

*Of Winters.*

**T**His Quarter takes beginning this Year on Thurs- day, the 10 of Decemb. 7 min. past eleaven in the afternoon; then the Sun enters the first scruple of the Tropical sign *Capricorn*, forming shorter days to us and all on this side the Equator.

The Natural Temperament of this Quarter is Cold and Moist; from hence it is, that youth and cholerick people are in best health; but aged and slegmatick consti- tutions are most distempered. If the Winter be dry, and much abound with South Winds without Frost, it cre- ath pains in the Brest, costiveness in the Belly, stopping of Urine, with sharpness, exulcerations, and inflammations. If it be over long Frost, with little or no snow, it is a fore-runner of a Plague the Summer following, as I hinted before.

The

The next three Moneths December, January, and February constitute the following Quarter.

December.

In this Moneth Melancholy and Phlegm much increase, which are heavy, dull, And cold, and therefore it behoves all that will consider their health, to keep their heads and bodies very well from cold, and to use such things as be of a hot quality. Broth made of Carrots and Onions are good, Cabbages is very good, and so are Onions of themselves, or insauce very good. Apples or Pears after meats are greatly commended, the flesh of Weathers, Rams, and Goats, excellent food. Capons and all manner of Land fowl very wholesome, but no Waterfowl, bleed but little, and for medicinal, for in no Moneth in the Year the Body hath less blood then now. Go not out of the house in the night, (unless necessity constrain) for the moist air of the night doth much harm the Body. Parsley Roots tenderly beaten, much comfort the Stomack. But Rape Roots heated under the Embers, all the Moneth for the Body health. Cows and Swines flesh is to be avoided, as being over moist for the Body, and unwholsom food. And drink oftentimes in this Moneth. And Honey, Cinnamon, Mace Nutmegs, Ginger, Gruing, Cloves, Galingale, and such like, often drunk or eaten in this Month, doth rise the Blood, the Heart, and all the Body.

January.

In this Moneth abstain from bleeding as much as may be, and beware you take not cold after bleeding. If necessity compel, walk not abroad in the night. Use to eat the best Confections, and to drink often White Wine in this Moneth, because Phlegm is very predominant. And so fast long, is very hurtful to the Body, but to eat Winter Sallers well prepared with Oyl and Spice, is much commended. A Bath or Hot-house is good, and to take Vomits is not hurtful; also take once every morning (throughout this Moneth) for three hours before dinner, a little quantity of Honey of Roses, for that the same doth much comfort the Stomack, and

bleeds

# SAUNDERS, 1668.

cleansc the body of cholera and flegm. And to drink also the se Spices with either Wine or Ale, as Grains, Ginger, Nutmegs, Cloves, and such like, are greatly commended this Moneth.

February.

In this Moneth use to eat Confections candied with Honey, for that they purge the Body; to eat Apples is commendable; but to eat often fresh Beef, or other meats that be moist, or to eat any Pot-herbs, except Parsly and Smallage, is thought hurtful; and oftner eat boiled meat then roasted this Moneth, because the same doth keep the Body soluble. Baths, Stones, to take Portions, and Bleed, are not hurtful. You may safely take Pills in this Moneth to purge the Head, such as are necessary, because the Head is more grieved, pained, dull, and heavy in this Moneth, then any other time of the Year; and to eat Honey with Bread in this Moneth, is much commended, for that the same doth both purge the Brest and Bladder.

These considerations I thought necessary to add, because they may benefit many, and can hurt none; for in a right Regiment of Diet and Order, consists our natural well-being.

Not

# A Prognostication.

Not good to bleed

At the change of the Moon, nor two days before or after; ♄ or ☐ of ♄ or ♀ forbiddeth the opening of a vein for 12 hours before, and 10 hours after; ♄ the Moon with the Dragons head or tail, and the ☐ of the Moon to ♄ or ♀ forbids to bleed a day before or after; ♄ combust nor good.

Good to let blood

The ☾ in ♄ or ♄ or within the rays of ♄ and when the Sun shall be in ♄ or ♀ with ♄ or ♀ when ♄ and ♀ aspect each other with ♄ or ♀, or be in ♄ likewise when ♄ and ♀ shall radiate themselves by ♄ or ♀ aspects of the ☾ to ♄ and ♀ are not hurtfull. ♄ being fortunate, and not afflicted, his aspects good, ♄ hurtfull, if contrary.

The ☽ void of course forbids not the letting of blood

Directions after Bleeding.

Sleep not presently, sit not violently.

Use not Venery, feed thou warily.

Notwithstanding, for the Phrensie, the Pestilence, Squinancy, the Plurisie, the Apoplexie, a continual Headach, growing of Choler and Blood, a hot burning Feaver, or any other extreame pain, in this case a man may tarry a chosen time, but incontinently with all convenient speed he is to seek and use his remedy, as if a chosen time might be respected.

Rules for giving Purges.
